**STERIL DOCK PRODUCTS SHELTER RANGE**

SUPERIOR SOLUTIONS FOR LOADING AND UNLOADING

# INTERNATIONAL SPECIALIST IN SAFE, SUPERIOR QUALITY LOADING & UNLOADING SOLUTIONS

Stertil Dock Products provide quality, customised and technically advanced loading bay dock equipment solutions throughout the world. These superior solutions are designed, developed and manufactured in-house by a team of specialists with expertise in the loading bay equipment industry. Stertil Dock Products is represented internationally by local sales organisations, exclusive distributors and a network of qualified Stertil Dock Products Service partners. Stertil Dock Products is the No. 1 safety and quality specialist in loading bay dock equipment. A whole array of patented products is a result of more than 45 years of experience and a continued commitment to ensuring safety in and around the loading bay.

## PROTECTIVE, EFFECTIVE, DURABLE AND HYGIENIC

Stertil Dock Products is your specialist in safety solutions and for a wide variety of industries. We offer a shelter range to effectively seal off the gaps between a docked vehicle and the opening of the loading bay. Our shelters contribute to keeping your buildings sustainable, protecting merchandise, vehicles, equipment and distribution centre and warehouse personnel. Stertil Dock Products offer a choice of shelters fitting to

every building situation and fleet requirements. Loading bay shelters seal-off and help reduce temperature fluctuations both in the warehouse building and in the vehicle. Our shelters are frequently used in BREEAM certified projects. We have a wide range from cushion and curtain shelters, through to especially designed inflatable, parcel and van solution shelters. All of our shelters provide complete protection against outside elements such as wind, rain, snow, insects, vermin, dust, dirt and other air pollutants. The loading bay dock shelters from Stertil are extremely durable. We can advise on a suitable solution according to your requirements.

The various dock shelters we offer differ according to their sealing efficiency and impact resistance.

We provide shelters in a variety of materials – from heavy duty CORDURA® – to our premium and very durable POWERFLEX®. All materials used, are very strong, anti-friction and have a long life span. Apart from the high quality sturdy construction and materials used on the Stertil Dock Products Dock Shelters, the unmistakable chevrons guide the driver when backing-up on to the dock, for safe and accurate positioning of the vehicle and increased visibility of the loading bay.

## The benefits of dock shelter seals:

- Protect, Preserve & Prolong.
- Very fast return on investment due to the use of high quality durable materials.
- Highly versatile and flexible for cross-docking and a wide range of vehicles and trailers.
- Models and materials for any building situation - new or replacement situations.
- Can be tailored to your specific requirements.
- Curtains and panels for a variety of shelters can be supplied in your corporate house style colours.
- Most shelters are available with the unique POWERFLEX®.
- All shelters are made in The Netherlands in the Stertil Dock Products Atelier.

# INFLATABLE SHELTERS

## WI/WIS SERIES

The Stertil Dock Products Inflation Shelters offer optimal sealing. This series is the superior solution for docks where vehicles or trailers of different heights and widths load and unload. The Inflation WI Series is available in two models; one with inflatable airbags both at the top and at the sides, and a model with an inflatable top airbag and side curtains (3 mm thick reinforced PVC).

Safety

Temperature Control & Insulation

Sustainable Green Building

Hygiene

- Optimal sealing and protection.
- Maximum flexibility for wide range of vehicles, trailers and swap bodies.
- Highly recommended for perishable products that require temperature fluctuation control or hermetic protection, such as food, cooled or frozen products and pharmaceuticals.
- Durable, top quality materials: galvanised support brackets, wear-resistant CORDURA® material for the airbags and an aluminium frame with insulated sandwich panels.
- Optionally available with the premium POWERFLEX® curtain and protection material.
- Standard Stertil® guidance chevrons.
- Fast inflation (~5 seconds) and deflation times (~20 seconds).
- Stertil Closed Door Docking System™ with the optional Stertil® Multi-Controls for a completely automated door and leveller operating sequence for docking with the building and trailer doors closed.
- Vehicle height sealing range from 3,500-5,550 mm; width from 3,500-3,700 mm.

# CUSHION SHELTERS

## TP/TI SERIES

An universal solution – the Stertil Dock Products Cushion Shelters are an excellent solution for loading bays where protection and insulation is required.

There are two models: the TP-Series is ideal for fleets with vehicles that have similar heights and widths and the TI-Series with inflatable top cushion which is recommended for increased flexibility for vehicles of varying heights.

Safety

Temperature  
Control &  
Insulation

Sustainable  
Green Building

Hygiene

- Very suitable for temperature control storage.
- Durable combination of a galvanised steel backing frame and strong reinforced foam cushions, and therefore suitable for use at locations with strict environmental requirements.
- Damage and impact safety protection due to armoured-sections on the front side of the cushions.
- For safe and accurate vehicle positioning visible yellow positioning markers.
- Optional bevelled cushions available to accommodate optimal sealing of narrow vehicles and recommended for use on inclined approach ramps.
- Custom-made for every loading bay situation.
- Vehicle height sealing range from 2,600-3,600 mm; width from 2,800-3,500 mm.

# CURTAIN SHELTERS

## W-SERIES

Versatility, flexibility and long-lasting, describes the Curtain Shelters from Stertil Dock Products. Available in frame models and various curtain materials. The W-Series offers a wide range of options to make it very versatile.

Safety

Versatile

Strong & Durable

- Optimal sealing for vehicles with various widths and heights which makes it the universal and flexible solution.
- Strong and durable reinforced curtain materials and available with the very tough POWERFLEX® premium high-quality shelter material.
- Fully flexible customisable aluminium frames to fit and meet all the requirements to seal any type of vehicle.
- Standard Stertil® guidance chevrons.
- Effective wind protection system to keep the curtains in place even under extreme wind conditions.
- Vehicle height sealing range from 3,250-4,000 mm; width from 3,500-4,000 mm.

# VAN HYBRID DOCK SHELTER

## WSTP-SERIES

The WSTP Van Hybrid Dock Shelter is specifically designed for parcel and courier warehousing facilities and distribution hubs. Utilised worldwide for fast, safe and secure loading and unloading of vans. The custom-made design is very durable and soft cushions provide a complete seal for vans that have doors which open to 180 degrees.

Safety

Energy Efficient

Parcel Industry

- Facilitate fast loading and unloading and increased efficiency.
- Precision and secure docking allowing for doors to be open completely - 180 degrees.
- Weather protection against wind and rain.
- Complete energy efficient seal between the van and the door.
- Strong and soft cushions with flexible foam preventing either damage to the dock shelter or the back of the van.
- Top cushion with special recess for vans that have rear-view cameras.
- Complete parcel industry solution for maximum safety in combination with the Van Bridge Plate Dock Leveller (*for more information please see the special brochure*).

## POWERLEX® long-life shelter curtain material

Stertil Dock Products curtain shelters can be optionally equipped with POWERFLEX® curtain material.

- High-quality polyurethane top and bottom layers, with a stable woven nylon middle layer (multi-layer design)
- Extremely high wear resistance
- Very high tear and wear resistance and always flexible
- Perfect seal with the truck
- Temperature resistant from -50°C up to +90°C
- High resistance to moisture and mould
- Long life span

*POWERFLEX® leaflet available for more information.*

A specific product brochure is available for the various shelters.
